

IWUG Online Meeting Minutes

April 17, 2014

Topics discussed:

Announcements

IDOC - Greg announced that vouchers for Assessment will not be split for FY14 and FY15. IDOC will be authorizing Assessment for FY14 and the provider can request Assessment units after July 1, 2014, if they did not complete the Assessment before the close of the fiscal year.

ISC - Lynn pointed out there are a couple of court trainings available on the WITS website and there are still some slots available for court coordinators to attend.

IDJC was not in attendance.

IDHW –

- Opportunities to learn the Treatment Plan and Treatment Plan Review are available on the calendar.
- There is an internal problem for website updates. The problem appears to be impacting document uploads mainly
- Attendance at trainings have been low so the number of trainings offered monthly will be reduced.
- The new user interface BETA is expected to be pushed to production by the end of May, if there are no major issues identified. If providers see issues, they are encouraged to submit the issues for resolution.
- Please remember to revoke WITS permissions for staff that leave your agency.

System Enhancements

A new release was just pushed to production. The 15.3 and 15.4 release have been pushed to production. The release notes should be updated soon. The WITS Help Desk will be testing 15.5, which is already in production.

Training

Denise showed users the Clinical Dashboard in WITS. The Clinical Dashboard has to be set-up before it functions correctly. Clinical Supervisors can use this area in WITS to provide clinical oversight of their staff. Clinical Supervisors can run feedback summaries for all or some of the staff they supervise. The staff can read the feedback. Staff should turn the Status field to “read” after they have reviewed the comments.

Clinical Dashboard training is on the training schedule although we have not had good turnout. If you have staff that would benefit from the training, please have them sign up for the training.

Q & A

When the BETA site goes live, does the old system shut down? No, you will see the new user interface when you log into WITS. All users are encouraged to use it and test it.
